Technical Specifications:

About:

The Futurismo Return Lever Accessibility takes the original design's bold, geometric lines and introduces a second sphere at the culmination of the cylindrical rod, allowing for visual symmetry, yet unexpected contrast in proportions. Now engineered for accessibility, this lever ensures it is intuitive

and functional for people with disabilities, while retaining its approach to geometric form and broadening its application to commercial and hospitality spaces. The Futurismo Return Lever Accessibility is a testament to our vision for accessibility access to be functional, without compromising design integrity.
